Education

Hanoi University of Science and Technology (HUST) — Hanoi, Vietnam
Bachelor of Vietnam-Japan Information Technology Program (HEDSPI) — *Sept. 2023 – Sept. 2027*
- CPA: 3.25/4.0

Bac Ninh Specialized High School — Bac Ninh, Vietnam
Specialized in Mathematics — *Sept. 2020 – May 2023*

Technical Skills

Languages: JavaScript, TypeScript, Java, C#, C/C++, SQL
Frameworks & Libraries: React.js, Next.js, Angular, Tailwind CSS, Node.js, NestJS, Express.js, Spring Boot, .NET Core
Databases, ORMs & Tools: PostgreSQL, Redis, Supabase, Prisma, Sequelize, BullMQ, Git, Docker

Experience

Swantech — Hanoi, Vietnam
Software Engineer Intern — *Jul. 2026 – Present*
- Engineered scalable RESTful APIs for an enterprise Room Booking module within a .NET Core microservices architecture, applying the Repository Pattern, DTOs, and Dependency Injection to maintain loosely coupled inter-service communication.
- Implemented stateless JWT authentication with granular Role-Based Access Control (RBAC) and built reactive scheduling interfaces using Angular, TypeScript, and RxJS—eliminating booking conflicts for 200+ internal users.

Sun* Vietnam — Hanoi, Vietnam
Full Stack Engineer Intern — *Jul. 2026 – Aug. 2026*
- Developed backend services in Java and Spring Boot for a Movie Ticket Booking platform, implementing transactional seat-locking logic (`@Transactional` and concurrency control) to prevent race conditions and double-booking during peak traffic.
- Built an interactive seat-selection matrix with a real-time reservation countdown using React.js and TypeScript, collaborating in an Agile/Scrum team to streamline booking workflows and reduce checkout latency by 25%.

Projects

AI Mock Interview — Jun. 2026 – Jul. 2026
github.com/lethanhan01/interview-coach
- Engineered a full-stack AI interview coaching platform that generates personalized HR and technical questions tailored to job descriptions and candidate profiles, delivering surgical persona-based evaluations on user responses.
- Built an interactive practice flow with Next.js, React.js, and Tailwind CSS, supporting voice and text responses, real-time session tracking, and comprehensive post-interview analytics.
- Architected an asynchronous backend pipeline using NestJS, Prisma, Supabase, Redis, BullMQ, and OpenAI APIs to automate audio transcription, rubric-based scoring, and segment-level feedback generation.

Gym Management System — Apr. 2026 – Jul. 2026
github.com/lethanhan01/gym-management-system
- Developed a full-stack gym management platform to streamline member subscriptions, trainer schedules, workout plans, equipment tracking, payment processing, and business analytics.
- Constructed responsive, role-based dashboards using React.js, TypeScript, Tailwind CSS, TanStack Query, and Zustand for optimized client-side state and server-cache synchronization.
- Designed secure RESTful APIs with NestJS, Prisma ORM, and PostgreSQL (Supabase), integrating JWT authentication, OTP verification, and granular role-based access control (RBAC).

Citizen Management — Oct. 2025 – Dec. 2025
github.com/lethanhan01/Citizen-Management — *citizen-management.vercel.app*
- Developed a full-stack administrative platform using React.js, Tailwind CSS, Node.js, and Express.js to digitize household registration records, temporary residence tracking, and demographic data workflows.
- Engineered RESTful APIs with role-based access control (RBAC) and relational data models via Sequelize ORM and PostgreSQL (Supabase), enabling fast multi-criteria filtering and automated statistical reporting.
